TQI *Solutions*
A SDVOSB Corporation

TQI*Evolve*ᔆᴹ

TQI*Evolve*ᔆᴹ

Problem Statement:

Too often, systems are modernized without a complete understanding of the gaps between the current "As-Is" processes and the desired "To-Be" future state. The **TQI***Evolve*ᔆᴹ process defines the "As-Is" workflow, capabilities, and requirements and identifies "To-Be" improvements, enabling a roadmap to the future state solution.

The Benefit to The Government:

Our **TQI***Evolve*ᔆᴹ process provides our customers with a baseline of documented business processes and requirements. **This enables:**

Optimized Business Process Improvements aligned with stakeholder and organizational mission objectives	Acquisition specific Requests for Information (RFI) and Requests for Proposal (RFP), and more comprehensive and capability aligned responses from industry partners.	Ability to map "As-Is" processes and identify gaps between proposed "To-Be" processes and out-of-the-box commercial-off-the-shelf solutions.
